Career Objective

To position myself within a forward thinking organization that mirrors my own excitement and enthusiasm for advanced FileMaker, web application, and mobile application development. Looking to work in a collaborative FileMaker & Web Application development environment.

Work Experience

2005 to December 2017

Centricity (formerly known as Bonded Builders Warranty Group, a division of Bankers Financial Corp), St. Petersburg, Florida: Sole in-house FileMaker developer, responsible for 200+ table, 50+ user, FileMaker v13-v16 environment serving as core business information system for a \$20M+ home warranty company. I developed a multitude of system enhancements, and created numerous web-based applications for its builder & homeowner customers using FileMaker as the backend. Experienced in FileMaker (all versions), HTML, CSS, JavaScript, jQuery, PHP, and fx.PHP. 10-time FileMaker DevCon attendee.

2004 to 2005

Independent Professional FileMaker Developer, working on various Asset Management and Point-of-Sale projects. Experienced at FileMaker 5/6/7/8/9+ development, including FileMaker Server deployments.

2000 to 2004

The Rosai Group, San Francisco - Field technician for an authorized Apple Specialist providing outsourced Macintosh I.T. services to numerous companies throughout the San Francisco / Silicon Valley area. This work afforded me the opportunity to work with hundreds of different companies providing an astounding range of consulting & support services. Through this position, I gained experience with virtually every Macintosh technology, including networking, server configuration & maintenance, backup systems, upgrades, troubleshooting & repair, training, purchasing, and I have experience with hundreds of applications, with special emphasis on FileMaker Pro & Server.

1993 to 2002

The CARDiologist™, Dallas, Texas, developer & franchiser of a chain of retailing boutiques providing business card printing & associated products in retail malls throughout the United States. This very successful business concept was my own creation, and was totally developed through my expertise in Macintosh computer technologies, FileMaker Pro software development, and retailing. The business was based around my FileMaker software solution which provided business card layout & production, inventory control, and point-of-sale functions.

1985 to 1993

Mr. Micro & Computize, Dallas, Texas- During this period I worked for the premier authorized Apple computer retailers in Dallas, Texas. As an account manager/salesperson, I worked with thousands of clients evaluating their needs and providing them with professional Macintosh sales, service & support. This is where and when I started working with FileMaker, helping numerous companies develop & deploy business management systems.

1984 to 1985

Micro Computer Center, Fort Smith, Arkansas - Inside sales representative for authorized Apple, IBM & Compaq computer dealership. I wrote this dealership's point-of-sale software in Turbo Pascal (PC).

Education

1983 to 1985

University of Arkansas - Areas of study included computer science, computer programming, electronics, accounting & business law. Completed studies with a 3.8 GPA. Included on Dean's List every semester.
